Subject: Tom Charlton questions

Hi everyone, Tom just sent me a message in Teams, see the following. I'll send his more specific questions once I get them, but this is above us and it's a quick turnaround so I wanted to give you the initial info.

I want to give you both an advance heads up that we in OECA are under a great deal of pressure to issue a Stop Sale Order tomorrow and to do that, we need some information from OPP. What we primarily need to know is whether the presence of PFAS in the Anvil 10+10 and the effect of HDPE containers on those PFAS levels create a need to for any different 1) conditions of registration, (2) labeling conditions, or (3) label conditions (i.e. directions for use, precautionary statements, storage or disposal conditions, e.t.c.). The reason for is that we need to determine that this product is misbranded (i.e, current labeling/labels are inadequate) as defined under Section 2(q). You will get a more refined set of questions soon but I wanted you to start thinking about responding to this. Please also let us know if we need to send these questions to anybody else in OPP. These questions are being developed in consultation with OGC. Sorry for the short notice.
